## On schedule

**May 1, 2012**

Just days after the formal ground-breaking, work is proceeding at a fast pace on the \$3.58 million addition to the White Lake school. Crews from Smith Concrete, Tradewell Construction, Duffek Sand & Gravel and Johnson & Jonette Mechanical are on site, working on underground utility connections, footings and foundations. "Right now you can see the footprint of the building," construction manager Doc Smith of EDS Builders said. The pace will continue with the arrival of the pre-cast concrete that will form the walls of the new gymnasium in mid-May and then the 100-foot long roof joists shortly thereafter.
